RICHARD CRANCH GREENLEAF was the youngest child of Dr. Richard Cranch and Adeline Emma (Stone) Greenleaf of Lenox, Mass. He was born in Berlin, Germany, in 1887. His boyhood was spent in Lenox, his education was by tutors except for one term at Middlesex School, and he never attended college.

At an early age he exhibited a talent for drawing and painting and was generally seen with a pad and pencil in hand. About 1905 he went to Paris and studied in the Atelier Julien. French art proved to be his love and he was profoundly influenced by the work of Fragonard.

After a few years abroad he returned to Lenox.

Jim, as Richard was always called, continued to paint and draw and study the books he had collected. In 1912 his father became seriously ill and in 1914 he died. Jim and his mother moved to Paris and were there when the First World War broke out. When the United States entered the war they hastily returned home and shortly afterwards Jim entered the Engineers Corps, Department of Camouflage, and was stationed in Syracuse, N. Y. Shortly after the war they returned to France.

They purchased a picturesque house in Barbizon and Jim continued building up his collections. With his great interest in lace, he became one of the founders of

the Needle and Bobbin Club and the first editor of its bulletin. He kept in touch with agents who might have information about important pieces of lace or textiles. Jim bought wisely and with great taste.

In 1936 Mrs. Greenleaf died in Barbizon and Jim decided to stay on there. In the Second World War German troops overran Barbizon, fortunately respecting his home. However, just before Pearl Harbor he decided to return to New York. He packed the bulk of his collection in various containers and he and his servant and friend, George Marois, took them to George's family farm. There they were stored in hay lofts, pig pens and other unlikely places. (When he returned after the war he found them untouched and unharmed in spite of the fact that both German and Allied armies had rolled through the district). He stuffed his most prized pieces of lace into a small wad and made it look like a pin cushion and then, with considerable difficulty, made his way home via Lisbon.

In New York he took up his bachelor existence at 277 Park Ave. He worked with the Salvation Army at one of their canteens during the remainder of the war and shortly thereafter returned to Barbizon, sold his house and gathered together his collections. He decorated his apartment with the framed laces, the tassels were displayed in a case, the textiles and waistcoats were kept in a specially constructed cabinet. He delighted in showing them to members of his family and his close friends, one of whom was Miss Frances Morris, curator of textiles and lace at the Metropolitan Museum.

The news of the pending sale and demolition of 277 Park Ave. in 1958 caused Jim to search for a new apartment. This move together with failing health made him become more or less a recluse. He was a person of unvarying habits. He seldom went out except for luncheon and to the meetings of the Advisory Council of the Cooper Union Museum. On the last day of 1961, at the age of seventy-four, he died in Roosevelt Hospital.

IN THE LIGHT of today's comparative restraint in dress for men, a first glance at the suits of silk and velvet, the waistcoats elaborately embroidered or brocaded, the laces to adorn throat or wrist, will carry with it for a moment a sense of masquerade. But the world of the 18th century loved fine design and skillful ornament; it was, as well, heir to a high tradition in fine weaving and embroidery. Without hesitation then, these arts were lavished, when the wearer could afford it, upon his clothing. In such a collection as this, fortunately preserved for today's study and enjoyment, we may observe a wide range of design styles, of variety in techniques in the embroideries and of most expert production of beautiful materials upon the hand loom.

MAN'S COAT AND WAISTCOAT; flame colored taffeta, trimmed with cording and tassels of same color. Probably England, first half of 18th century. The suit was the property of the Hon. William Greenleaf, 1725-1803, of Boston, the great-great-grandfather of Richard Cranch Greenleaf.

Lace

*The complicated terminology peculiar to lace is defined in a glossary on page 35.
All threads are of linen unless otherwise indicated*

AMONG THE HIGHLY DEVELOPED SKILLS of the hand craftsman, none was so popular in its day as the making of lace. Italy, France and Flanders were the centers of lace manufacture during its great period — from the middle of the 16th to the beginning of the 19th century.

The beauty of lace does not alone rely upon technique, no matter how intricate or complex. As in any art form lace depends upon balanced juxtapositions, a certain, but controlled amount of repetition, a rhythm which brings together individual parts dominating a given area, but in the end subservient to the whole. For design motifs much early lace relied on religious themes, but during the late 17th century a new spirit was introduced into lace manufacture which was further developed throughout the 18th century. Often designed by well known painters, subject matter for lace no longer relied exclusively on traditional religious iconography.

The techniques of making lace are of two kinds, needle and bobbin. These subdivide into distinguishable design types, further explained in their respective sections in the catalogue.

NEEDLE LACE

Needle lace, the older of the two categories, is believed to have derived from embroidery. The examples of Punto Tagliato listed below are evidence of this transition. Lace is, however, independent of a solid woven construction, essential for any kind of embroidery.

The technique relies upon the use of a needle, one thread, and a single repeated stitch, the buttonhole stitch. The lace maker generally works on a support of either heavy paper or parchment, upon which the pattern has been drawn, which provides body for the lace and makes designs of broad outline possible.

PUNTO TAGLIATO

A type of cutwork in which portions are cut following a given pattern from a woven linen ground. The open areas which are left are then usually filled with needle lace such as Reticello, Punto in Aria, or both; often one finds the outlines edged with a metallic thread.

CHALICE COVER; *Center* — rosette enclosed by symmetrically placed floral and foliated forms; *Outer border* — pattern of running floral and foliated branch. Italy, late 16th-early 17th century.

65

ACC. NO. 1962-50-15 [BO]

An additional example is Acc. No. 1962-50-187.

66

RETICELLO

Derived from Punto Tagliato [cutwork], and Punto Tirato [drawn work], Reticello bears characteristics of both, and is the earliest distinct needle lace. Areas cut away are edged by tight buttonhole stitches. Other patterns are opened through the drawing of threads. Reticello patterns are geometric in appearance, reminiscent of gridwork, and often connected by *brides picotées*. Frequently Reticello is found in combination with other lace types or embroidery.

BORDER; symmetrically intertwining bands forming hexagonal shapes enclosing representations of human figures, lower border composed of geometric motifs in alternating pattern of Punto in Aria and Punto Quadro. Italy, mid-16th century.

67

ACC. NO. 1962-50-35 [K]

BORDER; geometrically arranged design of abstract human and animal forms contained within square units, bordered on one side by a zig-zag band and lesser geometric forms. Italy, mid-16th century.

68

ACC. NO. 1962-50-125

BORDER; single band composed of geometric motifs in alternating repeat pattern bordered by small triangular pendants. Italy, first half of 16th century.

69

ACC. NO. 1962-50-124

BORDER; Figure of St. Anthony and Christ Child, flanked by large geometric rosettes, interspersed with floral and foliated forms; *Upper and lower border* — geometric motifs in an alternating pattern. Spain, late 16th-early 17th century.

70

ACC. NO. 1962-50-210

CHALICE COVER; *Center* — woven linen square with Reticello insertion and surrounded by evenly spaced geometric motifs in Reticello; *Outer border* — foliated forms and triangular pendants in bobbin lace. Italy, 17th century.

71

ACC. NO. 1962-50-201

Additional examples are accession numbers 1962-50-136, -202, -213, -214 [C].

72-75

Examples combining Reticello with Punto in Aria or embroidery are accession numbers 1962-50-63, -127, -131, -133, -185 A and B [MO], -186 [MO], -188, -189, -191 [MO-SF], -192 [MO-SF], -207 [C].

76-86

PUNTO IN ARIA

Punto in Aria is the earliest type of free needle lace no longer depending on a solid linen foundation. Its pattern is not cut or drawn away as in Reticello, but worked from a single thread, tightly buttonholed, connected from one part of the pattern to another by *brides picotées*. In appearance this type is often characterized by a free non-geometric design.

BORDER; three horizontal bands containing individual scenes from mythology and legend. Spain, late 16th-early 17th century.

87

ACC. NO. 1962-50-23 [P]

BORDER; single band, containing boats and mythological sea creatures with attached

border composed of stylized heart-shaped forms. Spain, late 16th-early 17th century.
88 ACC. NO. 1962-50-29 [P]

CHALICE COVER; Biblical subject, probably Christ at Gethsemane, surrounded by a double border of highly stylized floral forms. Italy, 17th century.
89 ACC. NO. 1962-50-20 [C]

CHALICE COVER; *Center* — medallion containing initials IHS, surrounded by highly stylized floral forms, with an outer border. Italy, late 16th-early 17th century.
90 ACC. NO. 1962-50-22 [C]

PANEL; *Center* — grotesque figure flanked by running floral and foliated scrolls interspersed by putti and animals, bordered by small geometric pattern. Italy, 17th century.
91 ACC. NO. 1962-50-72 [P]

FRAGMENTS; alternating arrangements of floral and foliated sprays in symmetric pattern. Italy, late 16th-early 17th century.
92 ACC. NO. 1962-50-226 A AND B

BORDER; double row containing alternate squares of embroidered linen cloth and insertions of Punto in Aria in geometric forms; *Lower border* — triangular pendants. Italy, late 16th-early 17th century.
93 ACC. NO. 1962-50-190 [C]

Additional examples are accession numbers 1962-50-21, -82, -123, -193 [MO-SF], 194 [MO-SF], -195 [MO-SF], -196, -197, -200 [C], -203 [SC], -204, -205, -208, -209 [C], -211, -212, -215 [MO], -216, -217 [C], -218 [C], -219 [C], -220 [MO], -221 [C], -224 [IK], -227 A and B [C], -257 [MO], -259, -320 A-D [BE].

94-124

BURANO

Believed to have originated in Burano, this type of lace is characterized by closely patterned design.

CHALICE COVER; *Center* — figure of a bishop, surrounded by floral scrolls terminating in angel heads at each of the four corners;

Border — stylized floral forms. Italy, Burano, 17th century.
125 ACC. NO. 1962-50-32

Additional examples are accession numbers 1962-50-223 and -256.
126-127

GROS POINT DE VENISE

The main characteristic of Gros Point de Venise is a high relief, achieved by outlining the pattern with *cordonnets* and working over this same heavy thread with tight buttonhole stitches, upon which a further decoration of *picotées* is placed. The *toilés*, or solid areas of the pattern, are interrupted by *gaze quadrillée* and *portes*. The pattern from one part to another is connected by *brides picotées*. In appearance, Gros Point de Venise is characterized by large, free-flowing scrolls, frequently interrupted by centrally placed human forms.

Introduced in France during the late 17th - early 18th century by Colbert, Minister to Louis XIV, the lace type became known as *Point Colbert*. About the same time, it was introduced in Spain, where it became known as *Punto España*.

MAN'S COLLAR; large floral and foliated scrolls terminating at either side of the front. Italy or France, about 1670.
128 ACC. NO. 1962-50-28 A

SMALL PANEL; centered angel, holding in his right hand a palm leaf, in his left hand a crown, flanked on either side by large floral and foliated scrolls. Italy, late 17th-early 18th century.
129 ACC. NO. 1962-50-26 [IK]

BORDER; serpentine pattern of large conventionalized flowers and foliage, partly in relief. Italy, France or Spain, late 17th century.
130 ACC. NO. 1962-50-62 [P]

ALTAR FRONTAL; figure of Saint Theresa in center, surrounded by floral scrolls in high relief. Italy or France, late 17th century.
131 ACC. NO. 1962-50-71 [P]

CHALICE COVER; symmetrical design of floral and foliated forms surrounding central floral motif in high relief. Italy, late 17th century.

132

ACC. NO. 1962-50-30

Additional examples are accession numbers 1962-50-80 [P], -112, -228, -230, -231, -236, -237.

133-139

PLAT POINT DE VENISE

Lacking the *cordonnet* outlines characteristic of Gros Point de Venise, this type of Venetian lace has a flat, two-dimensional quality.

FRAGMENT; stylized floral and foliated forms in large scale symmetric scroll design. Italy, 17th century.

140

ACC. NO. 1962-50-229

Additional examples are accession numbers 1962-50-111 and -240 [C].

141-142

POINT DE VENISE A ROSE

Point de Venise à Rose bears all characteristics of Gros Point de Venise, but with pattern of a smaller scale. The *cordonnet* outlines the pattern, again elaborately decorated with *picotées*.

FRAGMENT; foliated and floral forms in asymmetric design. Italy, Venice, late 17th-early 18th century.

143

ACC. NO. 1962-50-233

Additional examples are accession numbers 1962-50-81 [P], -89 [P], -108, -109, -110, -164, -238 A-C, -239 [C].

144-151

ROSALINE

The climax in craftsmanship of the Venetian laces is reached in Rosaline, a form of Gros Point de Venise but more elaborate and delicate in detail. The *cordonnet* outlines the pattern, again further raised by *picotées*. The addition of *fleurs volantes* gives this lace a characteristic plasticity.

PAIR OF LAPPETS; "candlestick" pattern of floral and foliated forms in high relief. Straight outer edge interrupted at intervals by clusters of blossoms. Italy, late 17th-early 18th century.

152

ACC. NO. 1962-56-61 A AND B

PORTION OF A FLOUNCE; elaborated variant of "candlestick" pattern, interspersed with human and animal figures. Italy, 18th century.

153

ACC. NO. 1962-50-235 [P]

Additional examples are accession numbers 1962-50-161, -232 [P], -234 [MO-SF].

154-156

POINT DE VENISE A RESEAU

Point de Venise à Réseau is Point de Venise embedded in *réseau*, or ground of mesh. The pattern is no longer connected by *brides picotées*, nor outlined by an elaborate *cordonnet*; the connecting device introduced becomes the *réseau*. The *toile* still shows the *gaze quadrillée* and *portes* as in Gros Point de Venise, but in addition this type introduces elaborate *modes*, such as *réseau mouché*, *fond de neige* and *enchainettes*.

PAIR OF LAPPETS; asymmetric design of floral and foliated forms, flanked at intervals by scalloped garlands, emerging from a geometrically shaped base. Italy, first half of 18th century.

157

ACC. NO. 1962-50-38 A AND B

PAIR OF LAPPETS; asymmetric pattern of floral and foliated sprays rising from a symmetrically designed floral base. Italy, first half of 18th century.

158

ACC. NO. 1962-50-2 A AND B

CAP CROWN; design of large conventionalized leaves, flowers and floral clusters surrounding a central heart-shaped motif. Italy, first half of 18th century.

159

ACC. NO. 1962-50-10

CUFF FOR AN ALB; stylized floral and foliated forms originating in a centrally placed heart-shaped motif. Italy, Burano, mid-18th century.

160

ACC. NO. 1962-50-13 [CL]

RABAT, OR CRAVAT END; *Center* — heart-shaped motif surrounded by strapwork pattern of bands, floral and foliated forms. Italy, first half of 18th century.

161 ACC. NO. 1962-50-16 [C]

BORDER; *Center* — blossom flanked by stylized floral and foliated forms in connecting overall serpentine design. Italy, first half of 18th century.

162 ACC. NO. 1962-50-65 [G]

BORDER; asymmetric floral and foliated sprays rising from urn-shaped forms in inverted repeat pattern. Italy, first half of 18th century.

163 ACC. NO. 1962-50-70 [C]

Additional examples are accession numbers 1962-50-12 [AU], -33, -49 [P], -94, -97, -105, -106, -114, -244, -245, -308, -321.

164-175

POINT DE FRANCE

Point de France is the French version of Point de Venise. Characteristically, the design is composed of human figures related to floral forms. The connecting device is a *fond* of *brides picotées*, which provides an airy quality to the lace. In the *toileé*, *portes* and *gaze quadrillée* occur and often *réseau mouché* and *enchainettes* appear as *modes*.

RABAT, OR CRAVAT END; *Center* — abstract foliated forms, flanked by identical stylized representations of trees, surrounded by an intricate pattern of volutes, urns and rocaille decoration. France or Italy, first half of 18th century.

176 ACC. NO. 1962-50-7 [W]

RABAT, OR CRAVAT END; figure dressed as a warrior, wearing a helmet in form of a double-headed eagle, standing on a *trophée* flanked by kneeling warriors, the scene surmounted by a royal crown and surrounded by dolphins, winged putti, warrior figures and foliated sprays. France, late 17th century.

177 ACC. NO. 1962-50-18 A [P]

RABAT, OR CRAVAT END; figure of a seated woman surmounted by stylized canopy surrounded by human figures, foliated forms and rocaille decoration. France, late 17th century.

POINT DE SEDAN

Believed to have originated in the city of Sedan, this variant of Point de France is distinguished by floral and foliated forms closely grouped, allowing little space for the connecting *brides picotées*. The *toileé* shows the *gaze quadrillée* and *portes*, the *modes* are *petit réseau*, *réseau mouché*, *point mignon*, and *fond de neige*, occasionally *St. Esprit avec rangs clairs*. Generally the pattern is outlined by a fine *cordonnet*.

BORDER; cartouches connected by floral and foliated sprays. France, early 18th century.

186 ACC. NO. 1962-50-115

PAIR OF LAPPETS; intricate pattern of floral and foliated forms in complex garland design. France, first half of 18th century.

187 ACC. NO. 1962-50-52 A AND B [P]

BORDER; garland of scrolled floral and foliated forms in repeat pattern. France, mid-18th century.

188 ACC. NO. 1962-50-113

BORDER; floral and foliated garlands, interrupted by diagonal bands. France, first half of 18th century.

189 ACC. NO. 1962-50-137

Additional examples are accession numbers 1962-50-86 [BL], -96, -99, -101, -242.

190-194

POINT D'ALENÇON

In general Point d'Alençon depends on a uniform *fond* employing a *réseau* of *bride bouclée* and *bride tortillée*. It is believed that the *réseau* was introduced about 1700. Other Alençon characteristics are the use of small scale patterns and the introduction of infinite numbers of *modes*, such as *enchainettes*, *réseau mouché*, *oeil de perdrix*, *petit réseau*, *St. Esprit avec rangs clairs*, *point mignon*, and *semé de larmes*, either employed independently or as *fonds*. By the late 18th century Point d'Alençon patterns were often worked on Flemish bobbin lace *fonds*.

BORDER; foliated forms and medallions in symmetric pattern surmounted by repeat design of oval wreaths terminating in floral sprays. France, early 19th century.

POINT D'ARGENTAN

The chief characteristic of this lace is its *réseau*, the *bride bouclée*. Visually the *réseau* is less delicate than that of Point d'Alençon. Argentan lace employs many of the same *modes* as those of Alençon lace. The *toilé* is also decorated with *gaze quadrillée* and *portes*.

DARNED FILET

Darned Filet relates to both needle and bobbin lace. The filet is made of horizontal and vertical threads knotted at all points of intersection, creating a square net. The pattern is darned into the filet. This textile art was well known and widely made during the 16th century and thereafter.

CHASUBLE; front and back panels of similar design, on front panel the names "Antonius" and "Matthaei," on the back panel Saint Barbara, holding her symbols — in her right hand an architectural structure, in her left hand a palm leaf; areas of identically com-

posed design on both panels, pairs of winged putti and angels, set within a large scale arrangement, emerging from an urn, of floral and foliated scroll pattern, surrounding a large ogival medallion which contains a floral spray. South Germany or Switzerland, mid-17th century.

253

MACRAME

The term Macramé derives from Arabic, and means knotting. A forerunner of bobbin lace, it is made by knotting individual vertical threads, which are either pinned into place or attached to the edge of a piece of cloth. Its outstanding characteristic is a long fringe of single threads. The technique was already in use during the 15th and 16th centuries.

BORDER; band of highly stylized human figures, alternating with vertical bands. Lower portion of inverted triangles ending in long fringe. Italy, late 16th-early 17th century.

254

ACC. NO. 1962-50-280

BOBBIN LACE

While needle lace is essentially embroidery upon itself, bobbin lace, sometimes called "pillow lace," is somewhat related to woven construction. Many threads are used simultaneously, sometimes as many as several hundreds. Each thread is wound on a small spool, or bobbin, which makes possible its manipulation without tangling. The lace making is done on a tightly stuffed pillow, to which threads are pinned and removed as the work progresses. The threads are crossed, intertwined, in a sense woven, on each other.

VENETIAN

Venetian pillow lace relates closely to the early needle lace, Punto in Aria. The pattern, usually contained within geometric forms, often resembles decorative iron work. Later examples of the 17th and 18th centuries introduce free, intertwining floral forms.

BORDER; narrow band of diagonal stripes in repeat pattern, floral serpentine alternating with wider bands of intertwining leaves. Italy, Venice, late 17th-early 18th century.

265-271

MILANESE OR FLEMISH

These two bobbin laces differ only in that Italian lace makers put in the *fond* of Valenciennes *réseau* after the lace pattern had been finished rather than before. Made of a finer thread, Flemish laces are softer to the touch than Milanese laces.

BORDER; repeat pattern of three large rounded pendants, in each a central motif composed of a grotesque human figure, surmounted by a vase from which rises a foli-

ated spray, flanked by birds in flight, animals and peacocks, each pendant enframed by a border of stylized floral forms. Italy or Flanders, early 17th century.

272

ACC. NO. 1962-50-272 [MO]

BORDER; narrow band in repeat pattern of birds in flight and geometric foliated forms, from which are suspended three large rounded pendants. In each, a double-headed eagle, surmounted by a crown, surrounded by foliated and floral forms. *Border*, smaller pendants, each composed of a single geometric motif. Italy or Flanders, mid-17th century.

POINT D'ANGLETERRE A RESEAU

The name given to this lace is a misnomer, as this lace was neither a needle lace, which would justify the "point", nor was it made in England. Generally it is believed that Point d'Angleterre lace was made in Brussels for the English market and smuggled into England at the end of the 17th century, since the importing of Flemish laces there had been declared illegal in 1662. The chief characteristics of this lace are a small *cordonnet* which raises the pattern into slight relief, a *fond* known as *vrai Droschel*, numerous *modes* such as *réseau mouché*, *venises*, *enchainettes*, and *fond de neige*. Point d'Angleterre is not a straight-edged lace — its threads follow the outline and the shape of the lace pattern. It is also believed that the lace itself was made separately and that the *fond*, the *Droschel*, was worked in afterwards in areas where needed.

RABAT, OR CRAVAT END; *Center* — figure of Minerva, placed below canopy, within symmetric tulip garden setting of balustrades, finials entwined by floral garlands and standing on arched trelliswork bases, potted orange trees on bases are balanced by two long-

tailed birds perching on either side of the lower balustrade. Floral sprays create all-over pattern in remaining areas. Flanders, Brussels, first quarter of 18th century.

VALENCIENNES

The early patterns employed in Valenciennes lace relate to those used in Flemish laces, while later examples show definite design influences, primarily detached floral sprays, from the needle laces of Alençon and Argentan.

In Valenciennes lace the *toile* and the *fond* are worked at the same time and in one piece. It is a straight-edged lace, in this respect identical to Mechlin lace, but Valenciennes lace lacks the shiny outline which is so characteristic of Mechlin lace. The *fond* is the *vrai réseau de Valenciennes*, a diamond mesh, sometimes the *maille rond* or the *maille carrée*. The *modes* found are the *fond de neige* and *maille à cinq trous*.

Provenance of this lace type shifts after 1678 from Flanders to France, when Valenciennes, the town of manufacture, became French by treaty.

PAIR OF LAPPETS; asymmetric, open floral pattern, enframèd by narrow garlands, terminating in abbreviated scrolls. France, Valenciennes, late 18th century.

BINCHE

Lace from Binche is often referred to as Fausse Valenciennes. Compared to Va-

lenciennes, Binche lace is not a straight-edged lace; its threads follow the outline and the shape of the lace pattern, such as in Point d'Angleterre. In addition to this difference, Binche lace is known for its numerous *modes* such as *maille à cinq trous*, *venises*, *amures*, and its elaboration of the *fond de neige*.

MECHLIN

Mechlin lace is often referred to as the "Queen of Laces" because of its delicate qualities. The designs found in Mechlin lace relate to those of Brussels lace, although the design is generally less pretentious. Mechlin lace can be differentiated from all other bobbin lace types by a fine, shiny thread which outlines the pattern.

The *fond* is the shorter *Droschel*, the *modes* employed are the *fond de neige* and *fond chant*. *Portes* occur in the *toile*. Like Valenciennes lace, Mechlin lace is a straight-edged lace, worked in one piece.

PAIR OF LAPPETS; series of medallion compartments, connected by volutes terminating in scrolls, containing in each respectively a winged cupid, prancing deer, leaping rabbit, together with an architectural structure beneath a tree, a flying bird and a bird perched on tree. Flanders, Mechlin, mid-18th century.

354-367

POINT DE FLANDRES

Point de Flandres was made of an unusually fine thread, produced only in Flanders. It was in direct competition with all Italian lace manufacture throughout the 17th century.

PORTION OF A FLOUNCE; alternating motifs, one composed of dancing female figure attended by winged putto, enframed by rocaille decoration, the other, a centrally placed potted tree set on table, flanked by figures dressed as Indians and surrounded by geometric forms and additional rocaille decoration. Flanders, late 17th-early 18th century.

LILLE

The town of Lille, formerly Flemish but a French possession since 1678, manufactured a lace during the late 18th and early 19th centuries, in design and pattern closely related to Mechlin lace, its only difference being its *fond*, known as *fond simple*.

MEDALLION; design encompassing shield of Napoleon I, surrounded by individual floral sprays. France, Lille, 19th century.

TONDER

Predominantly made in Tonder, Denmark, this is a type of drawn work, combined with embroidery, imitating both bobbin and needle lace patterns. The pattern, generally outlined by *cordonet*, was carried out on either very fine muslin or linen. Tonder work often employed a coarse needle with a very fine thread. By doing so it created an effect of openwork meshes, suggesting drawn work, although the threads of the cloth remained intact.

PAIR OF LAPPETS, muslin; serpentine garland of floral and foliated forms, accentuated by intermittent parallel bands, interpretation of a French pattern. Denmark, Tonder, first half of 18th century.

Textiles and Embroideries

THE SELECTION OF TEXTILES represented in the bequest indicates the collector's appreciation of excellence, whether in style, technique, design or artistic skill. His recognition of the educational values of such documentation from the past is evident in the meticulous care expended on the mounting of so many choice fragments from the post-Renaissance period up to the beginning of the 19th century, which encompassed his collecting interest.

Among these textiles is a group of velvet pictures, by Gaspard Gregoire (1751-1846) and some of his imitators, of particular interest because of their extraordinary technique. Late in the 18th century Gregoire developed a process, which he kept secret, of painting a design on the velvet warps, which were later woven in the piece. The method required the utmost skill in calculation and in weaving. It is in some ways related to the process of warp printing or *chiné* of which this collection shows examples. Many of Gregoire's designs were copies of paintings. As Gregoire's production was not large his works are rarely found in textile collections, although they may be seen in some French museums.

Caps and Coifs

THE EMBROIDERED CAPS in this collection are exceptionally fine examples of the renaissance of English embroidery which followed a decline in the craft after the great period of the medieval embroidery, called *Opus Anglicanum*. Under the Tudor Elizabeth the art of needlework was renewed by the embroideress of the newly prosperous merchant class who, supplied with silks and gold thread imported from the Levant and the fine steel needles now first made in England, turned to manuscripts, herbals and pattern books for designs of flowers, fruits and an infinite variety of insects and worms which she loved to employ in her patterns. Such caps as these shown were for indoor, informal wear by both men and women.

The infants' caps of a later century, which show such delicate decoration were probably for the special occasion of the child's christening.

CAP AND WIG STANDS

In the wake of fashion, special auxiliary objects emerge which often tell their own delightful story of changing fancy, inventiveness, and a kind of limited but perfect functionalism. As wide armchairs were introduced to accommodate hoop skirts, and tea sets were designed in response to the fashion of tea drinking, so wig and cap stands were made and delightfully decorated to fill their limited but decidedly useful role as complements to contemporary fashions. As so often in the 18th century, these purely Western objects were made not only in the *faïenceries* of Europe, but also, on order, in the porcelain factories of China. That some of the European pieces should be decorated with the fashionable chinoiserie design of the period is a particularly charming reminder of the lively exchange of ideas and products between East and West.

THREE CAP STANDS, porcelain, underglaze blue and iron red; decoration of dragons and flowers. China, for the European market, mid-18th century.

AN UNUSUAL COLLECTION of white linen tassels from the late 16th through the 17th century will be seen throughout the exhibition. Many were used as trimming for, and to weight, the corners of lace table and altar covers. Smaller, more delicate tassels hung from tie cords of lace collars.

The construction of these tassels is intricate and beautiful. Many employ

lace stitches as well as knotting. In one large tassel a double-headed eagle forms the skirt; in several appear little figures of people, many with the addition of gold thread.

Such collections are rare and are valuable examples of skills of the hand used for the creation of the elaborate ornament of the period.
